Protect Your Family with a Comprehensive Contagion Kit for Pandemics, Chemical Spills and Nuclear Accidents

- *Viral Pandemics have already happened and they will happen again. It's only a matter of when, and ContagionSurvival.com is here to fill the needs of individuals and families who are looking to secure supplies well in advance of a Pandemic.*
- *In a discussion with leading pathologists, Dr. Oz was told that it may take months to produce a vaccine, and investment in preparedness is warranted. By the time a worst case scenario is warranted, fear, panic and a run on supplies will make the situation worse, leading to a potential breakdown in social services and social behaviors.*
- *This is the point during which you will NOT be able to find protective gear such as hazmat suits, respirators and sanitizers. That is why the CDC recommends that you prepare yourself and your family NOW!*

Our DELUXE FAMILY CONTAGION PACK contains 3 Full-Face Respirators with Multi-Contaminant Filters for NBC's, 3 Bio-Suits, Plastic Sheeting, Duct Tape, Barricade Tape, Bio-Bags, Surgical Masks, Lighting, Gloves and Disinfectants. We also carry Packs for Individuals as well as Powered Respirators that provide a constant air-flow

The CDC says, "Get a Kit, Make a Plan, Be Prepared".
