I have a request from Chris T. on Twitter to promote a petition to demand the release of Marine A. I have placed a link to the petition at the top of my blog please take the time to sign it.

Pandemic Quick Kits Review

These handy Pandemic Quick Kits are designed for fast and inexpensive protection from Contagions when you or your family members have to leave your safe zone. Simply discard the entire suit when you return to insure that no contaminants enter your home. Not meant for close continuous patient contact.

Contents:

Coveralls w/Zipper

Adhesive tape to seal ankles/wrists

Shoe Covers

Hair Net

Goggles - splash-proof and anti-fogging

N95 Medical Respirator

Latex Gloves 2-pair

Bio-Hazard Disposal Bag

PAWS Antimicrobial Hand wipes - 4

Buy our inexpensive Pandemic Quick-Kits by the bulk and supply your family or even your entire neighbourhood.

Doctors, Dentists and Medical Technicians wear these disposable Coveralls to protect their clothing from splash and bacteria.

We still recommend a complete Contagion Kit, but for fast, everyday use, these packs are inexpensive to store and convenient to use and discard.

As this life saving kit only arrived this Thursday I have not had too much time to play with it, but I felt it was important enough to open the pack and try on the contents.

Firstly it is obvious that whoever designed this kit knew what they were doing as they have thought of everything in fact this is a complete pandemic kit and you should all have one for each member of your family or group as an aid to bugging out or to be worn if and when you have to travel through an Ebola hotspot.

The one piece suit is a one size fits all and is very easy indeed to put on, and with the shoe covers on and my ankles and wrists taped I did feel protected and I have to say it was very comfortable to wear.

Now combine that with the goggles which are splash-proof and anti-fogging the N95 Medical quality Respirator and the Latex Gloves of which there are 2 pairs and I really did feel safe and confident that if I had to enter an area where people had contracted Ebola or any other contagious disease pre-or post SHTF that it would provide me with the protection I would need. The kit also comes with a hair net to tuck away long hair for example PAWS Antimicrobial hand wipes which kill 99% of germs on the skin while removing dirt and debris.

I have no idea how they can produce such important and necessary kit for such a low price and then offer discount for bulk orders.

This is just what we in the prepper and survivalist community have been looking for, something that really works at an affordable price.

At Just \$11.95 each which at today's rate is £7.47 they are amazing value and top quality

I cannot recommend this kit highly enough and I must really thank Todd West, GM

Of First Aid Global, LLC who pulled out all the stops to get a Pandemic Quick Kit to me.

You can order yours directly from the company
